Serial No. 10/621,509

For: System and method for searching, finding and contacting dates on the Internet in instant messaging networks and/or in other methods that enable immediate finding and creating immediate contact.

Response to your notice to file corrected application papers

Regarding Fig. 9, I would like to reply that it contains excessive text because it is an example of textual output displayed to the user preferably on the computer screen (the user can also print it on paper). It is an exemplary list of compatible dates that people can receive from the system in one of the possible variations. This list can be for example viewed on a computer screen and/or printed. Therefore it is not possible to show this example without the text. What is important in this case is the content of the list and not specific computer graphics. If I understand correctly, your notice about the drawings refers only to Fig. 9. The other drawings are mainly flow charts, and fig. 8 is an example of a preferable way that the Contactee list can look like for example on a computer screen.

Regarding the payment for the claims, I will submit a set of amended claims with a reduced number of claims, so the excess claims fee will have to be recalculated.

Thank you very much,

Yaron Mayer
